

Tutorial on

Programming Novel AI Accelerators for Scientific Computing

NAIRR Annual Meeting
March 10, 2026

Murali Emani
Argonne National Laboratory
memani@anl.gov

Varuni Sastry (ANL), Sylvia Howland (Cerebras), Tim Clarke(SambaNova)

Tutorial Agenda

<https://github.com/argonne-lcf/ALCF-AIAccelerators-tutorial/blob/NAIRR-tutorial>

Agenda

Time (EST)	Topic/Speaker
9:00 AM - 9:15 AM	Welcome and Overview of the ALCF AI Testbed
9:15 AM - 10:30 AM	SambaNova
10:30 AM - 11:00 AM	Coffee Break
11:00 AM - 12:30 PM	Cerebras
12:30 PM - 1:30 PM	Lunch
1:30 PM - 2:00 PM	Discussion, Q&A
2:00 PM - 3:00 PM	Tenstorrent
3:00 PM - 3:30 PM	Coffee Break
3:30 PM - 4:15 PM	Groq
4:15 PM - 5:00 PM	Discussion, Q&A

ALCF AI Testbed

Cerebras

SambaNova

Groq

Graphcore

Tenstorrent

- Infrastructure of next-generation machines with hardware accelerators customized for artificial intelligence (AI) applications.
- Provide a platform to evaluate usability and performance of machine learning based HPC applications running on these accelerators.
- The goal is to better understand how to integrate AI accelerators with ALCF's existing and upcoming supercomputers to accelerate science insights

ALCF AI Testbed

ALCF AI Testbed Systems are in production and available for allocations to the research community

Training

- Cerebras

Cerebras CS-3 – 4 WSE

Inference

- SambaNova SN40L – Metis
- Groq
- Cerebras
- Tenstorrent

2 nodes of 16 SN40L RDUs

9 Groq nodes,
8 GroqChip/node (TSPs)

Cerebras CS-3 – 4 WSE

2 Tenstorrent
Galaxy server2 -
32 wormhole chips

HPC

- Cerebras
- Tenstorrent

Cerebras CS-3

Tenstorrent Galaxy

Getting Started on ALCF AI Testbed

Available for Allocations

- Cerebras CS-3,
- SambaNova Datascale SN30,
- GroqRack
- Graphcore Bow Pod64
- Sambanova Inference – Metis SN40L (Available for all ALCF users via Inference Service Endpoints)

AI Testbed User Guide

Director's Discretionary (DD) awards

- Scaling code
- Preparing for future computing competition
- Scientific computing in support of strategic partnerships.

Allocation Request Form

NAIRR Pilot

Aims to connect U.S. researchers and educators to computational, data, and training resources needed to advance AI research and research that employs AI.

The [ALCF AI Testbed](#) houses some of the most advanced AI accelerators for scientific research.

The goal of the testbed is to enable explorations into next-generation machine learning applications and workloads, enabling the ALCF and its user community to help define the role of AI accelerators in scientific computing and how to best integrate such technologies with supercomputing resources.

The AI accelerators complement the ALCF's current and next-generation supercomputers to provide a state-of-the-art computing environment that supports pioneering research at the intersection of AI, big data, and high performance computing (HPC).

The platforms are equipped with architectural features that support AI and data-centric workloads, making them well suited for research tasks involving the growing deluge of scientific data produced by powerful tools, such as supercomputers, light sources, telescopes, particle accelerators, and sensors. In addition, the testbed will allow researchers to explore novel workflows that combine AI methods with simulation and experimental science to accelerate the pace of discovery.
